### "YOUR PART REQUEST IS GRANTED"

**Summon Electronics** is a leading electronic component distributor and supply chain solution provider. We focus solely on navigating the global marketplace to offer our clients the most competitive prices possible whilst ensuring on time production and delivery. The depth of our experience in the market place brings a unique insight to the solutions that we provide to our clients.

## OUR ADVANTAGES

- ◆ In House Cable Assembly Services
- ◆ Reeling Service
- ◆ Engineering Support
- ◆ Quick Response Time
- ◆ BOM Upload Tool
- ◆ Market Analysis Report
- ◆ Procurement of Hard to Find Parts
- ◆ Blanket and Scheduled Orders
- ◆ No Minimum Quantity Surcharge
- ◆ Flexible Pricing
- ◆ BILL OF MATERIALS UPLOADS
- ◆ ESD Packaging
- ◆ MSL Packaging
- ◆ FREE SHIPPING
- ◆ Custom Delivery

## POWER SUPPLIES & BATTERIES

MANUFACTURERS WE LOVE

Established in 1989, **CUI Inc** focuses on improving the experience for the design engineer. Providing a diverse range of ac-dc power supplies, dc-dc converters, and power filters, CUI Inc also provides a variety of power resources and unparalleled customer service to improve the way power products are purchased now, and in the future.

**MEAN WELL** is a leading switching power supply manufacturer with products like AC/DC switching power supplies, DC/DC converters, DC/AC inverters, and battery chargers. MEAN WELL power supplies are widely used in automation, communication, medical, moving sign, and office automation fields.

PULS

**PULS** has been dedicated to electrical engineering for over 35 years. The company devotes itself exclusively to the development, production and sale of power supply products for DIN rails. PULS combines engineering know-how, strength and energy to ensure it stays at the top of its game. This focus means that the company is setting the benchmarks for technology and quality.

All products are manufactured at two state of the art production plants.

**Phoenix Contact** is a global market leader and innovator in the electrical engineering and automation sectors. Founded in 1923 the family-owned company from Blomberg, Germany, now owns an international distribution network providing guaranteed proximity to its customers. Phoenix Contact offers innovative products and solutions around industrial connection technology, automation, interface-systems and surge protection. The product range includes sensors, controllers, modular terminal blocks, splash-proof machinery connectors, wireless Ethernet products for up-to-date control cabinets, and custom solutions for various applications.

SIEMENS

**SIEMENS**, Power Supplies Comprehensive portfolio from a single provider Including SIRIUS power supplies and transformers and our stabilized SITOP power supply units, our range of power supply systems raises the bar for reliability, compactness and functionality. Our extensive portfolio also comprises SIDAC power supply systems, AS-Interface power supplies, and the SINVERT grid-inefed system for larger photovoltaic systems and solar power stations.

VICOR

**Vicor Corporation**, manufactures and markets innovative, high-performance modular power components, from power modules to semiconductor-centric solutions, to enable customers to efficiently convert and manage power from the power source to the point of load. Vicor's Power Component Design Methodology enables power system designers to reap all of the benefits of modular power component design – predictable component and system functionality and reliability, fast design cycles, and easy system configurability, re-configurability and scaling – while achieving system operating efficiency, power density and economy that rival the best alternative solutions.

**WAGO**'s efficient power supplies always deliver a constant supply voltage – whether it's for simple applications or for automation with greater power requirements.

## ACTIVE COMPONENTS

## MANUFACTURERS WE LOVE

---

**Intel®** programmable solutions (formerly Altera®) enable designers of electronic systems to rapidly and cost effectively innovate, differentiate and win in their markets. Intel offers FPGAs, SoCs, CPLDs, and complementary technologies, such as power solutions, to provide high-value solutions to customers worldwide.

**Microchip Technology Inc.** is a leading provider of microcontroller, mixed-signal, analog and Flash-IP solutions, providing low-risk product development, lower total system cost and faster time to market for thousands of diverse customer applications worldwide. Headquartered in Chandler, Arizona, Microchip offers outstanding technical support along with dependable delivery and quality.

ON Semiconductor®

**ON Semiconductor** is driving energy efficient innovations, empowering customers to reduce global energy use. The company is a leading supplier of semiconductor-based solutions, offering a comprehensive portfolio of energy efficient power management, analog, sensors, logic, timing, connectivity, discrete, SoC and custom devices. The company's products help engineers solve their unique design challenges in automotive, communications, computing, consumer, industrial, medical, aerospace and defense applications. ON Semiconductor operates a responsive, reliable, world-class supply chain and quality program, a robust compliance and ethics program, and a network of manufacturing facilities, sales offices and design centers in key markets throughout North America, Europe and the Asia Pacific regions.

**STMicroelectronics** is a global independent semiconductor company and a leader in developing and delivering semiconductor solutions across the spectrum of microelectronics applications. An unrivaled combination of silicon and system expertise, manufacturing strength, Intellectual Property (IP) portfolio, and strategic partners positions, STMicroelectronics is at the forefront of System-on-Chip (SoC) technology and its products play a key role in enabling today's convergence trends.

**Texas Instruments Incorporated** designs and manufactures analog technologies, digital signal processing (DSP) and microcontroller (MCU) semiconductors. TI is a leader in semiconductor solutions for analog and digital embedded and applications processing. A global semiconductor company, TI innovates through design, sales and manufacturing operations in more than 30 countries.

■ TOP MANUFACTURERS

## MANUFACTURERS WE LOVE

**CONEC** is a leading global designer and manufacturer of a wide variety of electronic interconnect products, featuring machined signal and power contact technology for Standard, High Density, Combination D-sub, designed for high reliability applications, or for IP67 harsh-environments and EMI Filter solutions. CONEC also offers an Industrial Circular line of IP67 harsh-environment RJ 45, USB, LC Fiber, M12, M8 type connectors for Industrial Ethernet and Automation applications. CONEC is a leading connector solutions provider for Aerospace, Automation, Communication, Industrial, Instrumentation, Medical and Telecom markets and committed to providing fast, reliable solutions to OEMs and contract manufacturers.

**Hirose Electric** Company specializes in the manufacture of connectors and has been a contributor to the development of the electronics sector for over 70 years. Their modest and humble business philosophy of seeking wisdom from all sources and incorporating that knowledge to maintain high quality and efficiency has earned Hirose a loyal customer base. Hirose is also committed to environmental issues in the manufacture of connectors such as coaxial connectors, FFC / FPC connectors, and single and double row connectors.

**HARTING** develops, manufactures and sells electrical and electronic connectors, device terminations, backplanes, network components as well as cable harnesses for networks or machinery, or for power and data application in factories. HARTING products are used in mechanical and plant engineering, broadcast and entertainment, factory automation, power generation and distribution as well as industrial electronics and telecommunication.

**ITT Interconnect Solutions**, a division of ITT Corporation, is a world leader in the design and manufacture of highly engineered connector solutions. They operate on a global basis serving customers in the aerospace and defense, medical, oil & gas, transportation and industrial end markets. From the invention of rack-and-panel and D-subminiature to the latest fiber-optic, composite and miniaturized connectors, ITT Interconnect Solutions has been synonymous with innovation, reliability and quality for over 100 years. Today their powerful brands, Cannon, VEAM and BIW Connector Systems deliver solutions that enable the transfer of data, signal, and power in an increasingly connected world.

**Lumberg** is a German family-run company which has been developing and producing connectors and contact systems and electromechanical and mechatronic components for any technical application for over 80 years. Lumberg's concentration on technology for automotive applications, household devices and on building technology and mobile radio networks has resulted in highly specialized user knowledge.

**Molex** brings together innovation and technology to deliver electronic solutions to customers worldwide. With a presence in more than 40 countries, Molex offers a full suite of solutions and services for many markets, including data communications, consumer electronics, industrial, automotive, commercial vehicle and medical.

**Schurter** specialize in the design and manufacturing of innovative electronic components that offer customers a safe and easy solution for circuit protection and power quality including fuses, fuseholders, circuit breakers, IEC connectors, power entry modules (PEM's), EMC filters and vandal resistant switches. Schurter's primary markets include Data Communications, industrial, Renewable Energy, Medical and Test Instrumentation.

Multi-Contact has been part of the **Stäubli** Group for 25 years. However it has been trading under the name Stäubli Electrical Connectors AG since January 1, 2017. Thanks to their high contact quality, low dissipation, and long life, these connectors are often used in demanding applications in tough environments with high current load capacity and high mating cycles. Over the last 40 years, Stäubli has also become a byword for high quality measuring equipment.

**TE Connectivity Ltd.** is a €14 billion global technology and manufacturing leader creating a safer, sustainable, productive, and connected future. For more than 75 years, TE Connectivity's connectivity and sensor solutions, proven in the harshest environments, have enabled advancements in transportation, industrial applications, medical technology, energy, data communications, and the home. With 80,000 employees, including more than 8,000 engineers, working alongside customers in approximately 140 countries, TE ensures that EVERY CONNECTION COUNTS.
